Management

Hedge Fund Partner

Serial Entrepreneur

Briefed U.S. Senate for A.I.

Cameron Fen, PhD

Head of Research

Ex-Researcher at

The Federal Reserve

Econ PhD, University Michigan

State Street Global Advisor

Background

The global cryptocurrency market currently has a Fully Diluted Valuation (FDV) of around **\$5 trillion**

The Market cap stands at approximately **\$3.5 trillion**

\$3.5T

\$5T

FDV - MC $\approx$ \$1.5T

Our target is the massive gap between them — **roughly \$1.5 trillion** in locked/vested tokens yet to be released — a huge, untapped opportunity in the evolving crypto space.

Product

LNT-Vault

Facilitate the issuance and management of node-based assets through NFTs

Active Vaults

...

...

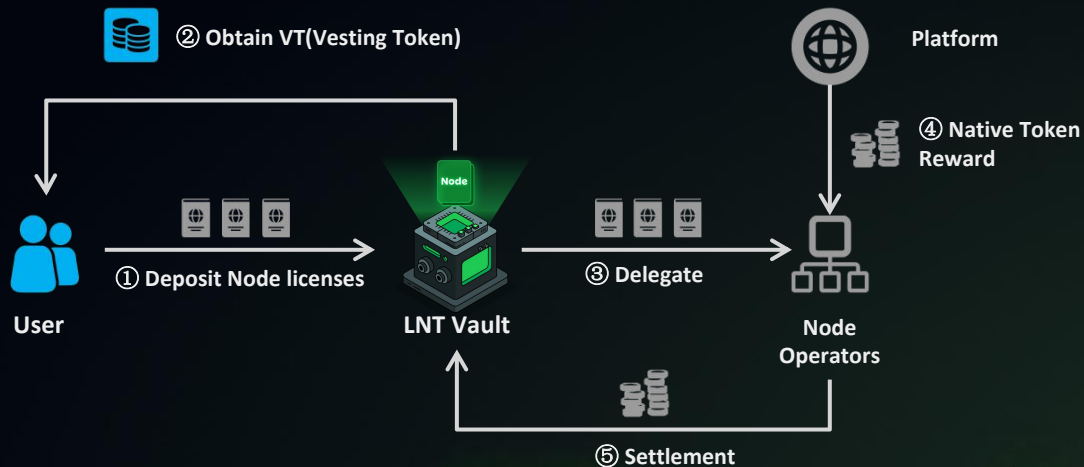

LVT-Vault

Make locked-up tokens in crypto projects tradeable right away, without breaking the rules or the project's long-term plans.

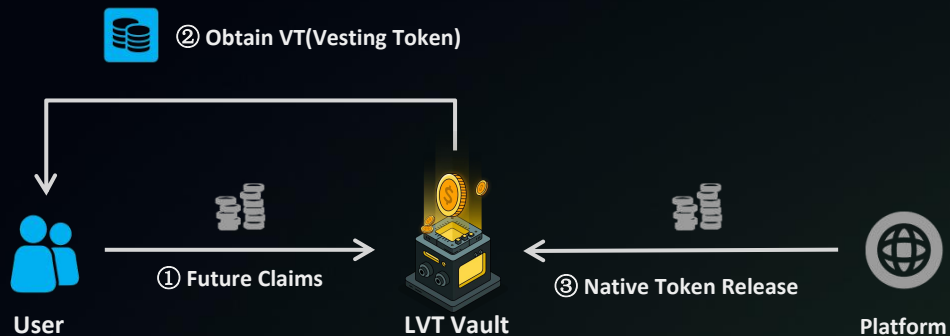

How does LNT work

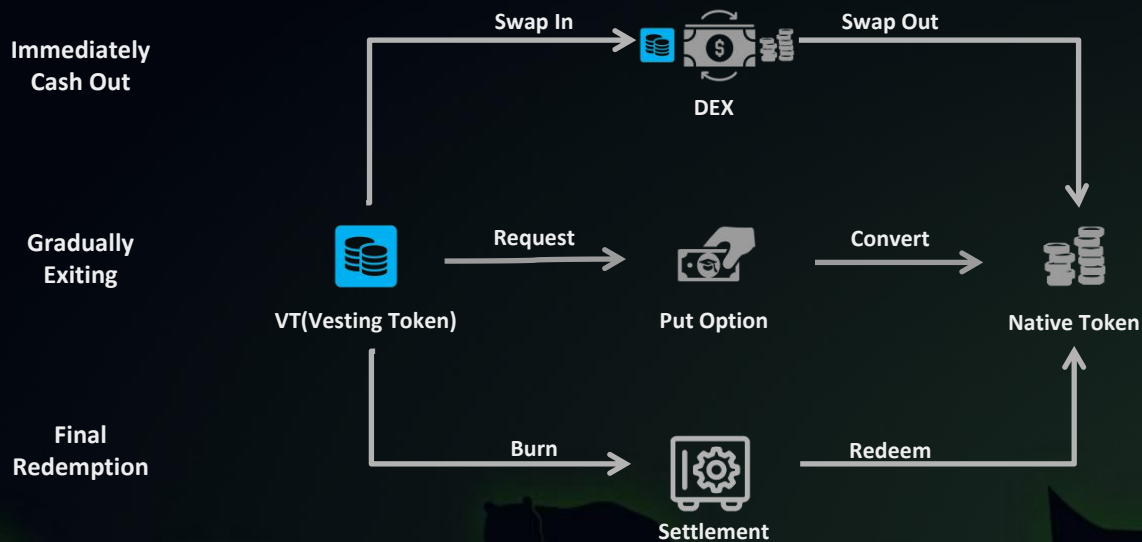

How does LVT work

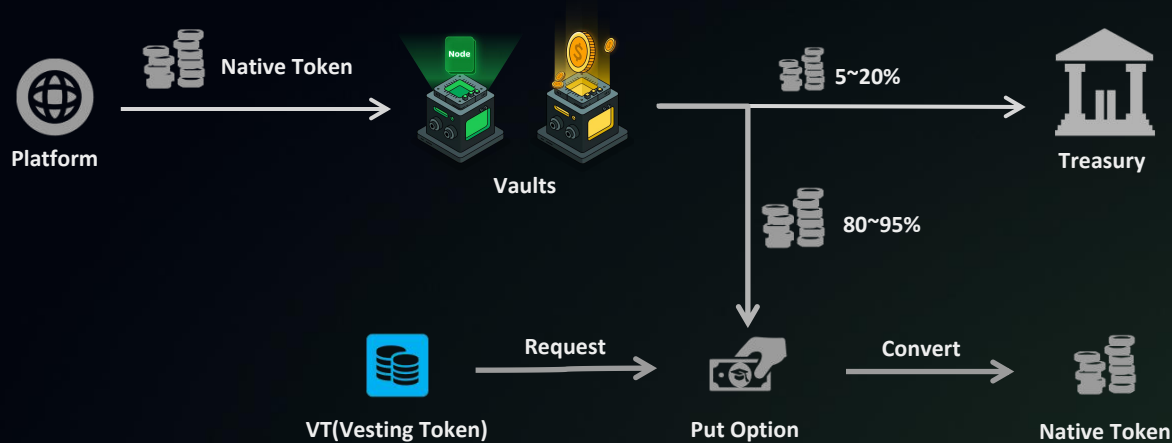

Unlocking Liquidity through VT

Protocol Revenue through Put Option

Revenue Forecast

Product

LNT Vaults
